PROFESSIONAL SUMMARY

Results-driven Machine Learning Engineer with 3+ years of experience designing, training, and deploying end-to-end Deep Learning and LLM systems. Proficient in PyTorch, FastAPI, and cloud AI infrastructure.

TECHNICAL SKILLS

Languages & Frameworks: Python, C++, PyTorch, TensorFlow, FastAPI, LangChain, Hugging Face.

Tools & Infrastructure: Docker, Git, AWS S3/EC2, PostgreSQL, WSL Ubuntu, REST APIs.

WORK EXPERIENCE

Machine Learning Engineer | *Apex AI Innovations* (2024 - Present)

- Fine-tuned Llama-3 70B models using QLoRA for domain-specific NLP tasks, improving generation accuracy by 24%.
- Built asynchronous FastAPI microservices serving model inference to 50k daily active users.

AI Research Intern | *DataVision Labs* (2023 - 2024)

- Implemented computer vision classification pipelines using PyTorch and OpenCV.
- Optimized PyPDF text extraction workflows for resume-driven evaluation benchmarks.

PROJECTS

Automated PDF Assessment Generator

- Built a full-stack platform using FastAPI, Groq LLM API, and Netlify to extract PDF text and dynamically generate timed 20-question quizzes.

EDUCATION

Bachelor of Technology in Computer Science & AI — Geeta University (2022 - 2026)
